## May Dental Arts Offers Straumann Surgical Solutions

Partners with Straumann® and Dental Wings® coDiagnostiX™

Fenton, MO – November 4, 2016

May Dental Arts LLC, a Straumann® Alliance Lab, has implemented the comprehensive dental system from Straumann® CARES® along with Dental Wings® coDiagnostiX™. It is a comprehensive dental interface, giving access to a variety of specific services and design solutions.

May Dental Arts was an early adopter of Straumann's software platform almost 10 years ago. "We have renewed our commitments and now offer the entire surgical workflow including the DWOS Synergy (<http://www.dentalwings.com/synergy>). This is Dental Wings' comprehensive and integrated solution for implant-borne cases. It brings the dentist-lab collaboration to an unprecedented level by merging digital guided surgery and CAD. Our complete portfolio of digital workflows enables clinicians to provide the best patient experience with greater predictability and accuracy. It improves turn-around time and reduced chair time", says Chris May, Founder and Vice President of Operations.

From intra oral scanning and implant planning support, 3D model and surgical guides printing, May Dental Arts' digital workflows expands restorative possibilities and available materials, providing dentists with full-service, quality dental laboratory services.

### About May Dental Arts

Founded in 2007, May Dental Arts, a Certified Dental Laboratory, is a full service laboratory specializing in restorations that are hand crafted with the finest materials available. We take pride in every restoration we craft. We provide a level of service and quality demanding practices deserve. We are proud to be an extension of your team and to be a resource for your practice.
